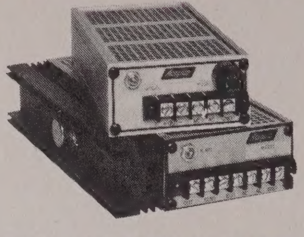
LOOKING FOR POWER SUPPLIES? SPECIFY ACOPIAN,

5V OR ±15V POWER FOR PCB'S

Acopian
MODEL
MINIATURE
AC to DC POWER MO

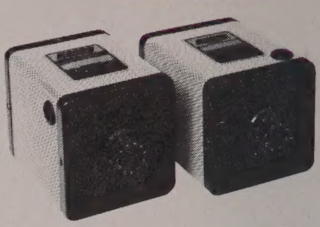
Mount these mini power modules, as small as 2.3" x 1.8" x 1.0", directly on printed circuit boards to save space and simplify wiring. Ratings at 5 volts from .250 to 2.5 amps; at ±15 volts from .025 to .5 amps. Short circuit protected. Prices start at $49. Guaranteed 3-day shipment.

SUPPLIES THAT FIT IN THIN SPACES



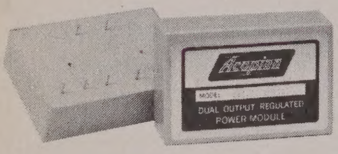
Measuring only 1.68" high, Acopian narrow profile power supplies fit where many others cannot. Available in a wide range of ratings from 1 to 150 volts, to 3.5 amps. Regulation to ±0.005%. Tracking dual output models for op amps also available. Guaranteed 3-day shipment.

SINGLE, DUAL PLUG-IN POWER



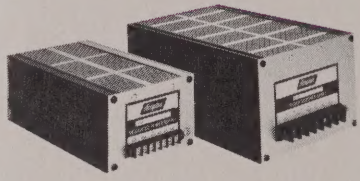
A plug-in power module can be installed in seconds. Simply plug it into a standard octal-type socket. Single output models from 1 to 200 volts. Duals combining two matched or dissimilar outputs in one case available in over 10,000 combinations. Warranty: 5 years. Shipment: 3 days.

MULTIPLE VOLTAGES FOR PCB'S



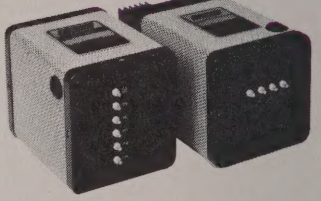
Simplify PC board layout with multiple output power mini's. Duals supply two isolated like or dissimilar outputs, 1 to 28 volts each. Op amp supplies provide ±12 or ±15 volts. Triples have two balanced, tracking outputs, a third for powering other circuits. Guaranteed 3-day shipment.

GENERAL PURPOSE POWER



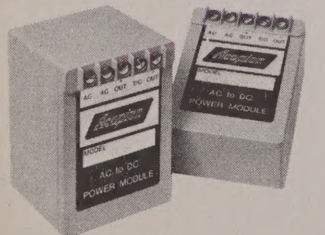
Series A offers premium performance, with regulation to ±0.005%, ripple of 0.25 mv maximum and electronic current limiting. Series B supplies provide a lower-cost approach, with regulation typically ±0.1%. Ratings to 200 volts, to 32 amps. Guaranteed 3-day shipment.

SOLDER TERMINAL MODULES



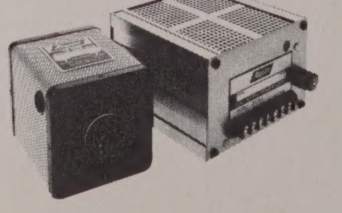
For applications where hard wiring is desired, Acopian offers modules with solder terminals. Included are single output models (regulated and unregulated), duals with two like or dissimilar voltages and high isolation supplies. Guaranteed 3-day shipment.

POWER MINI'S FOR LOGIC OR OP AMPS



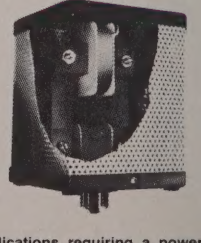
Terminal strip input output connections on these miniature power modules eliminate the need for sockets or soldering. They mount in an area only 3.5" x 2.5". Ratings: 5 volt models to 2.5 amps; ±15 volts to .5 amps. Other models from 1 to 75 volts, all with 3-day shipment guaranteed.

MATCHED OR DISSIMILAR DUAL OUTPUT



Select the combination of matched or dissimilar outputs that you require. Hundreds of ratings available, from 1.5 to 150 volts. Outputs are isolated, and may be used in the same or opposite polarities. Acopian's 3-day shipment promise applies for any combination.

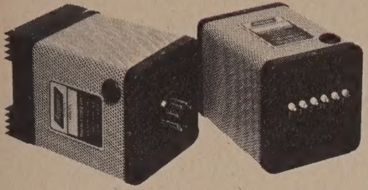
HIGHLY ISOLATED POWER



For applications requiring a power supply with unusually high isolation, such as for powering strain gage or other transducer circuits, Acopian offers models with ratings from 5 to 36 volts. Input/output isolation: 10,000 megohms minimum. Guaranteed 3-day shipment.

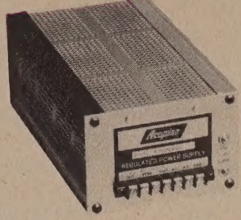
FAMOUS FOR 3-DAY SHIPMENTS . . . GUARANTEED

MIL-TESTED PLUG-IN POWER



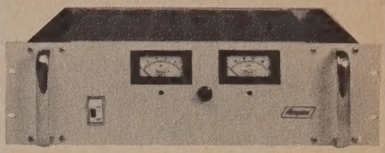
MIL-tested power supplies withstand unusually severe environmental conditions. These extended-temperature plug-in modules exceed MIL specs for humidity, altitude, vibration and shock. Hundreds of single output models, thousands of dual output combinations, all guaranteed for 3-day shipment.

BROAD VOLTAGE ADJUSTMENT



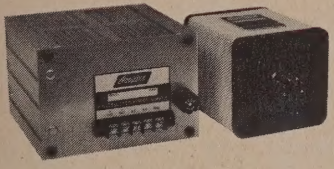
Power supplies with the broad adjustment capability required for analog instrumentation and circuitry, electronic system development, basic research, and similar applications. All may be remotely programmed. Many available with adjustable current limiting. Output voltage ranges from 0-6 to 0-150 volts, current ratings to 16 amps. Modular supplies shipped in 3 days; rack-mounting models, in 9 days.

RACK MOUNT POWER ...TO 60 AMPS



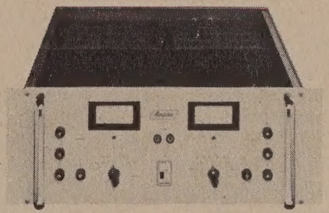
Designed for mounting in standard 19″ RETMA cabinet racks, these power supplies are available in 76 different output ratings from 1.5 to 60 volts, and from 5 to 60 amps. Regulation, ±0.05% or better; ripple, 1 mv rms or better. Options include metering and overvoltage protection. Shipment, 9 days after receipt of your order.

POWER FOR RELAYS AND DISPLAYS



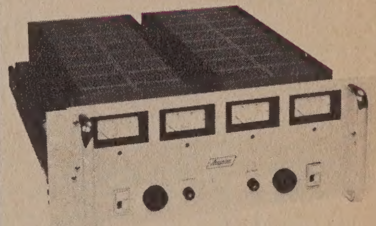
Drive relays, lamps, small motors and similar loads with low-cost Acopian unregulated power modules. Built-in fusing protects against overloads or shorts. Series U models use terminal strip connections. Plug-in modules mount in standard octal sockets; many have adjustable outputs. Guaranteed 3-day shipment.

NEED A POWER SYSTEM?



Order multiple output power systems without searching through a catalog, preparing mechanical layouts, item-by-item pricing and detailed purchase requisitions. Instead, call Acopian. We'll listen to your needs, quote a firm price, and then ship your built-to-order system, fully wired and tested, in just 9 days.

REDUNDANT POWER SYSTEMS



Output reliability is maximized by including two power modules for each voltage. If either fails, the other will continue to provide an uninterrupted output. Standard models from 5 to 28 volts, to 55 amps. Shipment, 9 days after receipt of your order.

POWERTEC

The ValuSwitcher™ family is Powertec's economical series of switching power supplies, both open frame and enclosed. ValuSwitchers are designed for low and medium power applications (50-400 watts). They are an extension of the SuperSwitcher™ family (240-1700 watts), introduced over ten years ago, and the MultiMod™ multiple output switcher family (300-1000 watts).

Designated Series 19, ValuSwitchers offer a fully regulated main output and a choice of fully regulated or semi-regulated auxiliary outputs. OVP is standard on the main output, optional on the others. Additional options include a power fail signal, EMI filter and cover.

Common mode input filtering, logic inhibit, AC undervoltage inhibit and remote sense are all standard features.

Reliability, quality, and performance, which have long characterized SuperSwitchers, are also hallmarks of the ValuSwitchers. And at a price that offers the best DC power supply value in the industry.

The following standard Quad voltage output combinations are available: (+5, ±12, −5), (+5, ±12, +24), (+5, ±15, −5), (+5, ±15, +24), (+5, +12, ±12), (+8, ±16, +24).

FEATURES
FCC & VDE EMI Option • VDE, IEC, CSA, UL Safety Specs • Remote Sense • Fully Regulated All Outputs OR Fully Regulated Main Output and Semi-regulated Auxiliaries • Efficiencies of Greater Than 75% on Most Outputs • OVP with Crowbar and Inverter Shut-down • Brown Out Below 85 or 170 VAC • Power Fail Signal Option • Inhibit • Cover Option • Soft Start Circuit • Reverse Voltage Protection • Extended Input Voltage Range: 90-132/180-264 VAC, 47-440 Hz • Field Selectable 115/230 VAC • Hold-up Exceeds 20 ms • Full Power Outputs at 50°C; Derates to 50% at 70°C • 100% Burn-in • Powertec's 18 Years of Proven Value

ValuSwitcher™

MultiMod™ is a new concept in multiple output modular switching power supplies providing an alternative to costly customs. It allows you to choose your voltage/current combinations from a large selection of standard switching power supplies and standard auxiliary output modules, and we do the rest.

The MultiMod switchers have 2 to 7 fully regulated outputs, which consist of one main output and 1 to 3 fully isolated plug-in output modules. These output modules are off-the-shelf standards which the designer can select as building blocks to provide his ideal voltage/current combinations. He is assured of dependable delivery of supplies which exactly match his unique requirements. And MultiMods operate with proven field reliability because they are put together with standard building blocks produced in high volume.

Main outputs use only pure switch mode design. All auxiliaries are also available as fully switching. Thus, the designer can be assured of maximum efficiency and minimum thermal stress. Post-linear regulated auxiliaries are also available.

Multiple outputs are available from 2 through 48 volts with modules rated from 12 to 750 watts. Total output ratings available are 300, 400, 600, 850 and 1000 watts.

FEATURES
FCC & VDE EMI Specs • VDE, IEC, CSA, UL Safety Specs • Field Selectable 115/230 VAC • Switching or Linear Regulated Auxiliaries Available • Efficiency Typically 75% • Full Power Outputs at 50°C; Derates to 50% at 70°C • Remote Sense • Fully Regulated • Extended Input Voltage Range: 90-132/165-265 VAC, 47-63 Hz • OVP with Crowbar & Inverter Shut-down • Power Fail Signal • Logic Inhibit • Soft Start • Brown Out of 85 or 160 VAC • Reverse Voltage Protection • 100% Burn-in

MultiMod™ Switchers

Quality, Reliability, Performance in Flexible, Economical, Designs.

SuperSwitcher™ is a Powertec first, developed over ten years ago. Today, it is the most second-sourced high power switching power supply on the market.

It's grown to a series consisting of more than 120 models, with both single and multiple outputs, ranging from 2 to 48 volts, and 240 to 1700 watts. Most models are the 5″x8″x10″ fan cooled box.

Reconfigured to meet the Safety Extra Low Voltage (SELV) requirements of the tough European safety specifications, the new 9N & 9K models are setting new standards of performance for high power switchers. The new designs offer 8mm spacing and 5300 VDC hipot capability. Add to this optional internal EMI filters to meet either FCC or VDE noise specifications in a 5″x8″x10″ package, and you can see how Powertec is leading the way. Need more power? Just give us 1″ and you can have the 9J, a real brute dependably delivering up to 1700 watts in a 5″x8″x11″ package. With a host of standard features and standard options, of course.

Too good to be true? Not from Powertec. We deliver. We set the standard for others to copy. But then, that's what creating a standard is all about.

Standard Models	
2V @ 120, 160, 200, 300, 400A	15V @ 32, 40, 50, 70, 105A
3.3 V @ 120, 160, 200, 300, 400A	24V @ 20, 26, 33, 45, 70A
5V @ 90, 120, 150, 200, 300A	28V @ 17, 28, 38, 60A
12V @ 40, 50, 62, 90, 130A	48V @ 10, 13, 17, 23, 36A

FEATURES

FCC & VDE EMI Specs • VDE & IEC Approved to Class I SELV, CSA Certified, UL Recognized • Field Selectable 115/230 VAC • All Outputs Switching • 75% Efficiency Typical for 5 Volt Outputs • Full Power Outputs at 50°C; Derates to 50% at 70°C • Remote Sense • Fully Regulated • Extended Input Voltage Range: 90-132/165-265 VAC, 47-63 Hz • OVP with Crowbar & Inverter Shut-down • Power Fail Signal • Inhibit • Soft Start • Brown Out Below 85 or 160 VAC • Reverse Voltage Protection • 100% Dynamic Burn-in: AC Cycled On & Off, Output Cycled from Full Load to No Load to Short Circuit • Standard Off-The-Shelf Delivery • Powertec's 18 Years of Proven Value

SuperSwitcher™

PowerSystems™ by Powertec is a highly flexible building block approach for your total system requirements using standard Powertec power supplies from our three families of switchers:

- ValuSwitcher™—44 Multiple Output Models from 50 to 400 Watts with Up to 5 Outputs—2 to 48 Volts.
- MultiMod™—300 to 1000 Watt Multiple Output Power Supplies with Up to 7 Outputs—2 to 48 Volts.
- SuperSwitcher™—240 to 1700 Watt Single Output Power Supplies from 2 to 48 Volts—Over 100 Models Available.

Powertec is capable of providing the following type of systems:

- True redundancy for 1 to 7 outputs to achieve maximum system reliability (not simply parallel operation).
- Up to 14 outputs and 2400 watts per system.
- Parallel operation for high current requirement on one or more voltages up to 3400 watts.

With PowerSystems™, individual outputs can be configured to your needs. All this in a standard 19″ rack mount or custom package that will meet UL, CSA, BT (formerly BPO) on some models, or VDE safety standards as required. PowerSystems™ by Powertec—deliver your total system power requirements.

FEATURES*

True Redundancy with Isolation Diodes for Fault Tolerance • VDE, IEC, CSA, UL Safety Specs • FCC and VDE EMI Specs • Standard 19″ Rack for Convenience • Safe "On-line" Repair/Replacement Capabilities in Redundant System • 100% Burn-in of Power Supplies
***Features apply to PS4001 shown below.**

how to use eem

The 27th edition of EEM has been further arranged, beyond the well-known EEM Product Sections, into four volumes, each composed of related Product Sections. And, for user convenience, each volume contains its own Product Index and Directory (green pages) and its own Manufacturers and Sales Offices Directory (yellow pages). Every Product Heading and every Manufacturer of electronic products is listed in each volume. Where, however, the Product Section is assigned to a volume other than that in use, a cross reference is made to the appropriate volume for further information.

To locate a specific product. Start by choosing the volume whose title describes the class of electronic product you are seeking. If you are not sure which volume is appropriate, pick up the first one at hand and find the product heading in the green pages. There you will find either a list of that product's manufacturers or you will be referred to the proper volume. All products are identified by their generic terms. Please read the detailed instructions on the first page of this section. Manufacturers with catalog data in this edition of EEM appear in bold face type and page numbers are shown. Manufacturers appearing in light face type have submitted verifying evidence that they supply the products shown. When you have located a product of interest, turn to the page(s) shown for further information. You will find these pages in each volume in the appropriate sections.

product selection guides

There are 33 Product Selection Guides included in this edition of EEM! They are located on the first pages of the Product Section to which they apply. Use these guides for basic selection parameters and then go to the EEM pages shown in the guide for more detailed information.

advertisers' index

To find a specific manufacturer's data pages, an alphabetical index of EEM participants appears in EEM starting on page 1A•4 of Volume 1A and on pages 1B•4, 2•4 and 3•4 of the other volumes.

trademark and logofinder directories

A comprehensive trademark directory is included at the end of the EEM green pages in Volume 1B. NEW in this edition, the EEM logofinder shows the symbols and graphics used by manufacturers as identifiers on their products. Use these pages to locate manufacturers of specific trademarks and logos.

manufacturers' index

In the EEM yellow pages you will find pertinent details on all manufacturers listed in EEM including local sales offices and/or distributors. Please refer to the detailed instructions on the first page of the EEM yellow pages for additional information.

to order a product found in eem

When you have located the product that suits your needs, call the manufacturer or the local sales rep or distributor as shown in the EEM yellow pages. Give the EEM data page number and specs from that page. You and the supplier will be talking on the same wave length which should simplify your ordering and buying.

to file manufacturers' catalogs and data

The EEM File System has been revised and updated. The new EEM File System contains a complete Product Index. This Index tells you where to file which catalog. It also contains a cross-reference so you'll know where catalogs are filed.

In order to use the new EEM File System all you need is a supply of standard letter size, third-cut, manila file folders which are available locally. You then use the pressure sensitive labels which are supplied with the File System to go into as much detail as you want (or need).

Each label fits the third-cut file folder exactly. There are 308 of these labels in one System: 1 for the Index, 1 each for the 61 EEM Product Sections, 24 for the alphabetical file of multiproduct catalogs, plus 222 additional labels for System expansion.

The System also includes 61 Cross Reference Cards so you can quickly and easily find multiproduct catalogs. The EEM File System is complete and can save you countless hours of time and thousands of dollars. The price? Only $25.00. Send a check to: EEM File System, 645 Stewart Ave., Garden City, NY 11530 and we'll absorb postage and handling. Send a purchase order and add $2.00 for postage and handling. NY and CA residents, please add sales tax.

85 Product Index and Directory

All products are listed alphabetically by their generic names and then by subclassification. For example, look for "Fiber Optic Connectors" under "Connectors, Fiber Optic" or for "Digital Panel Meters" under "Meters, Panel (Digital)."

Following each product heading is a four-digit number directing you to the Product Section where these products are usually cataloged. If that Product Section is not in the EEM volume you are using, a "See Vol.1A, 1B, 2, or 3" will direct you to the proper volume for your product classification. No numbers appear with cross-reference headings.

Under each product heading whose Product Section appears in the volume you are using, the names of the manufacturers who supply the product are shown in alphabetical order with EEM catalogers shown first in boldface type with appropriate page numbers. Other manufacturers are shown in light face type. The symbol (§) indicates that these products are available from local distributors. The symbol (†) indicates that the product is available to MIL specifications.
